Go Back You Fool-Faron Young
Author:Donald Robertson and Hal Blair

```
C                                       F              C
You're heading down a lonely road that someday you'll regret
                            G7
Go back you fool while you can
C                                        F                C
Your darlings heart is breaking but you haven't lost her yet
            G7              C
Go back you fool while you can

    F                                 C
You wonder around the honky tonks acting fancy free
   F                                  C               G7
So blinded by those tavern lights that you can't see
    C                                F              C
You passed the door to heaven in search of paradise
                  G7                  C
Go back you fool take another fools advice

                                          F             C
You're standing where I stood before so young and so mislead
                            G7
Go back you fool while you can
     C                                    F                   C
When I walked out and slammed the door I wish someone had said
            G7              C
Go back you fool while you can

  F                                    C
I wouldn't want to tell you wrong I hope that you can see
   F                                  C             G7
If you don't believe in what I say just look at me
  C                                F              C
I passed the door to heaven in search of paradise
                  G7                   C
Go back you fool  take another fools advice
```
