Go Cat Go-Norma Jean
Author:Harlan Howard

```
C                            F
You don't want a home and a family
    C                              G7
You say you just can't live that slow
    C
You like your music loud
    F
And you like that swinging crowd
   C               G7     C
So say goodbye and go cat go

                                          F
You say the sound of wedding bells don't move you
    C                                  G7
And babies may be cute but they cry so
     C
I'll find someone to share
    F
The life that you call square
   C               G7     C
So say goodbye and go cat go

G7                     C
Go cat go may life be good to you
G7                       C
May all your night be a ball
  G7                           C
I hate to have to try to get over you
    D7                             G7
But your life don't move me at all

  C                                  F
I may be wrong to think that you'll miss me
  C                                G7
I may still be around I don't know
    C
I'd know there'll be tears
    F
But that jukebox hurts my ears
   C                G7     C
So hit the road and go cat go
                    G7     C
So hit the road and go cat go
```
