Golden River-Hank Snow
Author:Stuart Hamblen

```
C                                   F                    C
I hate to see night shadows fall I hate to see a moon above
                                     G7
For it brings me dreams of days gone by
        C                           F                    C
When my darling Lola Lee strolled along the shore with me
                           G7             C
And we watched the golden river glide on by

             F            C                       G7
Golden river golden river you took my love from me
        C                  F
On your waves of golden hue you carried her with you
    C                 G7               C
And broke my heart a million million ways

                                    F                 C
Now I sit and wonder why I feel so blue and want to cry
                                                  G7
While I watch the moon climb slowly in the sky
       C                            F                C
It was on a night like this when she gave me her last kiss
                      G7               C
Climbed in her birch canoe and sailed away

             F            C                       G7
Golden river golden river you took my love from me
        C                  F
On your waves of golden hue you carried her with you
    C                 G7               C
And broke my heart a million million ways
