Good-Tammy Wynette
Author:Billy Sherrill and Glenn Sutton

```
G                              G7           C
I was a waitress in a barroom no future in sight
                 G           A7                D7
And he was just lonely when he came there that night
G                                 G7             C
Then someone played the jukebox and he asked me to dance
                   G       D7               G7
And when he softly held me I thought it's my chance

      C                        F
To be good like I want to be that's what he's saw in me
C                       D7            G7
Not just a girl on the wrong side of town
C                       F
Good like I used to be he brought it out in me
    C                              G7                C
And that's when I promised that I'd never let him down

G                               G7          C
Now I'm back here in a barroom a waitress again
                    G         A7              D7
The good world I've lived in just came to an end
G                               G7          C
For temptation comes easy to a woman like me
                    G          D7             G7
And regardless of my chances I know that I'll never be

C                          F
Good like I used to be I guess it's just not in me
C                  D7           G7
With all my heart how I wish I could have been
C                           F
Good like he wanted me but good is what I'll never be
    C                G7            C
And now I know that he's gone for good
```
