Goodbye Time-Conway Twitty
Author:Roger Murrah and James D. Hicks

```
C               F                   C
It's your life  you say you need a change
F             C                       Am           Dm
Don't all the dreams we've seen come true mean anything
C                          F                          C
you say it's different now and you keep staring at the door
F           C          Am               Dm
How can you walk away  don't I matter anymore

G7       C              Am               F
If being free  is worth what you leave behind
G7             C         Am                  F
And if it's to late  for love to change your mind
G7               C
Then it's goodbye time

                 F                     C
If we had known  our love would come to this
F             C                       Am             Dm
We could have saved our hearts  the hurt of wasted years
C                    F               C
Well it's been fun  what else can I say
F      C             Am                   Dm
If the feelings gone words won't stop you anyway
```
