Growing Apart-Gene Watson
Author:Dave Kirby and Warren Robb

```
G
When we first started on our way through love
                          D7
We thought we were two of a kind
                        G          Em
We thought forever was just you and me
    C        D7        G
And always a matter of time

C                 G
Time has a way of changing it's mind
D7                      G
We're giving on each others heart
C                     G          Em
Our love grew till it ran out of room
       C          D7           G
Now it looks like we're growing apart

We had a mountain of our very own
                                  D7
That turned out we just couldn't climb
                          G           Em
We've just been waiting for something to give
    C          D7          G
And we've been standing in line
```
