Guess We Thought The World Would End-Bobby Helms

```
G                    D7          G
Guess we thought the world would end

                         D7
We never thought of the future
                        G
The past we didn't let in
                          C
Time stood still while I held you
         G           D7          G
Guess we thought the world would end

                            D7
All of it was wrong and we knew it
                       G
We didn't try to pretend
                         C
We only lived for the moment
         G           D7          G
Guess we thought the world would end

C                              G
We never thought of the heartaches
D7                       G
We'd bring to somebody else
C                         G
Blinded by love for each other
A7                       D7
We only thought of ourselves

G             D7
You belong to another
                  G
We'll never love again
                C
For a moment I held you
         G           D7          G
Guess we thought the world would end

                                  C
Time stood still while I held you
         G           D7          G
Guess we thought the world would end
```
