I'll Never Get Over Loving You-Connie Smith

Intro:

```
C          D7              G
I'll never get over loving you

                        C
Ever since the day you said goodbye
    D7                        G
And walked away with someone new
                       C
I can't be happy I just sit and cry
     D7                   C
I'll never get over loving you

       C                                G
I have always been so happy with your love
                                    D7
I've been true I'll swear by stars above
G                       C
Now you tell me you and I are through
         D7                      G
But I'll never get over loving you

                        C
No one else could ever take your place
     D7                          G
I've tried going out with one or two
                                 C
But each time I look at them I see your face
        D7                       G
No I'll never get over loving you

        C                                  G
I can't figure out just what it is I've done
                                     D7
Did I ever make you cry or make you blue
G                                  C
But it be you found someone you think that you
      D7                    G
Could never get over loving too
```
