I'm Counting On You-Kitty Wells
Author:Don Robertson

```
G                                                    D7
All the words that I'll ever known still could not say
                              G
How much I need you so in every way
                                                   C
I go wrong and you'll guide me as only you can do
                    G          D7               G
Hold my hands stand beside me  I'm counting on you

              C                                    G
I'm counting on you dear from the dawn of each day
   C                        A7                     D7
To always come through dear in your kind loving way
G                                                     C
If you knew just how deeply I feel the things you do
                   G           D7               G
Then you know how completely  I'm counting on you

              C                                    G
I'm counting on you dear from the dawn of each day
   C                        A7                     D7
To always come through dear in your kind loving way
G                                                     C
If you knew just how deeply I feel the things you do
                   G           D7               G
Then you know how completely  I'm counting on you
