I'm Falling For You-Merle Haggard

```
C                                    G7
You bring me happiness and leave me loneliness
                                                C
My world is in distress cause I'm falling for you
                                     G7
You look into my eyes and tell the sweetest lies
                                                    C
You're a heartbreak in disguise and I'm falling for you

C7          F                               C
Oh darling when you're near my world is happy dear
             D7                                G7
But when you disappear I'm afraid that we're through
           C                  G7
I love in misery you're so unfair to me
                                               C
It's all a mystery why I'm falling for you
```

Repeat #2
