I'm Glad To Have Her Back Again-Johnny Paycheck

```
G                                        C
I know you think I'm crazy to take her back again
     D7                                          G
Just when she's fresh from her little world of sin
                                        C
But you don't know my sorrow and you don't face tomorrow
                    G
She might be bad but she's all I had
        D7                    G
And I'm glad to have her back again

            D7                                        G
I'm glad to kiss those lips that I've miss for so long
            D7
I'm glad to take back the heart
                  A7          D7
For my part for a dance and a song
G                                              C
Don't tell me she can't change for I know she can
                    G
She might be bad but she's all I had
        D7                    G
And I'm glad to have her back again

Repeat #2

C                   G
She might be bad but she's all I had
        D7                    G
And I'm glad to have her back again
```
