I'm Just Me-Charley Pride
Author:Glenn Martin

```
C                                    G7
Down at the railroad station there's people getting on

Some are going north and some are going south
                    C
I'm just going to be gone
                                   C7                F
Some people are born to be takers others just wanna give
                  C                  G7           C
Some people live just to love but I just love to live

               F                   C
Oh I was just born to be exactly what you see
         G7                        C
Nothing more or less I'm not the worst or the best
        F                   C
I just try to be exactly what you see
           G7                  C
Today and everyday I'm just me

                                    G7
When people say that life is rough I wonder compared to what

Some are wanting more and mores are gettin' less
                   C
I just want what I got
                         C7                  F
Some wanna live on a hill others down by the sea
                  C                   G7                 C
Some wanna live inside high walls I just wanna live free
```
