I'm Over You-George Jones
Author: Bobby Braddock
[3/4 time]

```
C               G7          C
My arms are not reaching to hold you
           F                          C
Cause your memory has stop haunting me
   G7                          C
My heart has quit aching and constantly breaking
D7                               G7
For the first time in ages I'm through

C               G7          C
This torch I've been caring for you
       F                  E7
Burned out a few seconds ago
    F                          C
Now I'm just a breeze in the tall Maple trees
              G7     C
Outside your window hello

F                C
I'm over you I'm over you
                                    G7
My prayers have been answered my dreams have come true
C                                  F
After long years of trying and gradually dieing
C           G7       C
At last now I'm over you

          G7              C
I kept on believing you'd come back
      F                   C
But I spent my last night alone
     G7                   C
Oh I see you sleeping and soon you'll be weeping
D7                               G7
When they call and tell you I'm gone

C               G7           C
So I think I'll just keep on moving
   F                     E7
Up into the cool morning sky
  F                   C
I wish you the best complete happiness
                  G7              C
I forgive you God be with you goodbye

F                   C
I'm over you oh I'm over you
                                    G7
My prayers have been answered my dreams have come true
C                                  F
After long years of trying I'm finally flying
C           G7       C
At last now I'm over you
```
