I'm Tired -Webb Pierce
Author: Mel Tillis, Webb Pierce, Buck Peddy

intro
```
C           F       G7                        C
Oh Lord I'm tired   tired of living this old way

C                          F
Standing on a corner of a busy street
G7                            C
I'm looking for your face in every crowd I see
                           F
Checking every honky tonk in this town
G7                             C
Trying to find the places that you hang around
            F       G7                        C
Oh Lord I'm tired   tired of living this old way

                                F
I've been waiting on you baby night and day
G7                               C
I'm wondering if your love will ever come my way
                                F
My time is running out and I'm slowing down
G7                             C
Tired of being just another hang around
            F        G7                        C
Oh Lord I'm tired    tired of living this old way

                                F
There ain't no happiness in anything I do
  G7                              C
I find myself so lonely when I'm not with you
                                          F
What makes you just the kind of girl a guy will love
       G7                                C
You've got so many others that you're thinking of
            F       G7                        C
Oh Lord I'm tired   tired of living this old way
```
