I'm Waiting Just For You-Wanda Jackson
Author:Henry Glover, Carolyn Leigh, Lucky Millinder

```
C                                  C7
You have to leave me all by myself dear
             F                       C
And I've been crying the whole night through
                           F    G7                    C
But I've been telling everybody I'm waiting just for you

                                   C7
Your friends are trying so hard to tempt me
              F                    C
There's no use trying cause I'll be true
                             F     G7                C
And darling you don't have to worry nobody else will do

                                 C7
I know this waiting can drive me crazy
               F                    C
Don't mind this waiting it's nothing new
                         F    G7                    C
For I'll be telling everybody I'm waiting just for you

                                C7
Maybe a long time before I see you
          F                   C
So we can do what we used to do
                         F    G7                    C
But I'll be telling everybody I'm waiting just for you
```
