I've Come Awful Close-Hank Thompson
Author:Ann J. Morton

```
C                                    F
Well never once have I cheated on my baby
G7                                    C
I'm a traveling man I go from coast to coast
                                     F
Now everywhere from San Diego to New York City
        G7                            C
I never done you wrong but I've come awful close

                                                F
Well I met a little peach when I was in Columbus Georgia
G7                                          C
Sitting in the booth next to mine in a little cafe
                                          F
All that I did was just buy her a cup of coffee
        G7                                  C
I had a heck of a time but I pulled myself away

                F            G7
I've come awful close nearly almost

I got right next to it but I couldn't do it
                             C
Heaven knows I've come awful close

                                            F
Well I pulled into an all night stop in Albuquerque
G7                                               C
Where a cute little waitress brought me my ham and rye
                                           F
She winkled and said I get off at seven thirty
       G7                                      C
Well I might have stayed but I told that gal goodbye

                                    F
So honey don't you worry about your daddy
G7                                    C
Just scramble my eggs and don't you burn my toast
                                     F
I'm rolling now I should make it home by Friday
        G7                                      F
Lots of guys would have done it but I've just come close

Repeat #3
