I've Lived A Lie-Ernest Tubb

```
C                            F    C
The time has come for me to tell you
       G7                    C
That I have been unfaithful dear
                        C7      F
It breaks my heart to do this darling
          C     G7          C
Because I want  you always near

                             F      C
I never meant to break our vowels dear
        G7                 C
I never meant to hurt you so
                 C7          F
And in my heart I'll always love you
                 C     G7       C
Although you'll hate  me now I know

                              F   C
I've live a lie and now I'll pay dear
              G7                C
What ever the prize it's up to you
              C7      F
I can't go and still deceive you
              C    G7          C
I've lived a lie  I've been untrue

                             F        C
It's true we all have made mistakes dear
         G7                          C
And I'll confess with tear dimmed eyes
                          C7        F
I've suffered more than words can tell you
        C        G7          C
And all because  I've lived a lie
```

Repeat #3
