I've Never Been So Blue-Jim Reeves

```
G
No matter what I do
C                  D7
Can't help if it's wrong
G            C
You know I'm blue
           D7  C                        D7
So I'll go on  crying my heart out for you

G                  D7
You don't adore my love anymore
       C      D7          G
You've fallen for someone new
C                        G         E7
You've made me lonely a few times before
    A7                    D7
But never have I been so blue

G                          D7
Why should you be just a memory
  C             D7          G
I can't find my way without you
C                        G       E7
Ole melancholy's got a hold on me
    D7                   G
And I've never been so blue

C                       G
Nothing but nights of loneliness
   D7                 G
No where to go but I start out
C                     G
Trying to lose this moment in
A7                      D7
But memories are tearing my heart out

G                       D7
I wouldn't mind being lonely sometimes
C                        G
I'd go right on loving you
C
But each night and day
      G
Since you've been away
           D7      G
I've never been so blue

Repeat last verse
```
