**I Thought Of You-Connie Smith**
**Author: Jimmy Rollins**

```
C                                    G7
Last night another held me in his arms
                                        C
A lover's moon was shining bright and clear
                                     G7
He whispered words of love so tenderly
                                              C
But I couldn't say the words he longed to hear

  F                                             C
I thought of you and things that might have been
                                            G7
I thought of you and it was useless to pretend
   F                                    C
Oh when he asked me if I loved him too
  G7                                             C
I closed my eyes sweetheart and thought of you

                                     G7
Well as he held me tightly in his arms
                                          C
I tried to find the thrill that we once knew
                                         G7
It could have hurt his heart if he had known
                                     C
That I was just pretending it was you
```
