If Fingerprints Showed Up On Skin-Freddy Hart
Author:Kenneth E. Hunt and Freddie Hart

```
C  F            C                  G7                          C
If fingerprints showed up on skin wonder who's I'd find on you

                               F                       C
I'm out of my mind with worry  you been out all night again
                                 D7                              G7
But don't tell me and I won't ask where in the world have you been
C                       F                C
I don't even wanna know what you been up to
          F             C                 G7                          C
Oh but if fingerprints showed up on skin wonder who's I'd find on you

        F                           C
I can't help it this feeling this hunger deep inside
    F                                  D7              G7
For loving you is the only food that keeps my world alive
C                                  F               C
I wish I didn't want and need you heaven knows I do
   F            C                  G7                          C
If fingerprints showed up on skin wonder who's I'd find on you
```
