If I'm Dreaming Just Let Me Dream-Brenda Lee
Author:Charlie Singleton

```
G                                   C
Please don't tell me if you're not real
            D7                  G
Let me keep feeling the way I feel
                                C
I'm bubbling over with love supreme
           D7                       G
And if I'm dreaming just let me dream

                                C
Ah please don't wake me if I'm asleep
             D7                 G
Just give the angels my soul to keep
                           C
I'd be so happy if I could speak
           D7                       G
And if I'm dreaming just let me dream

            C                          G
My heart is jumping up and down the street
              A7                          D7
If this ain't love it's the next best thing

G                                       C
So keep on doing what you're doing to me
            D7                        G
If I'm your prisoner don't set me free
                                    C
Your red hot kisses warm me like steam
                D7                      G
Cause so if I'm dreaming just let me dream
```
