If It Was Easy-Ed Bruce
Author:Larry Kingston and Harlan Sanders

```
C                                F
I wish there was a way to love a lot
               C                          G7
And only hurt a little when love lets you down
C                                F
I wish there was a way to love and run
                     C                          G7
And not find the hurt behind you when you turn around
      Am                                  F
But I guess I know why love's the way it is
  Am                                F               G7
I think I know why love is such a game of hit and miss

          C     F        G7
If it was easy  everyone would do it
          C     F              G7    C
If it was easy  everyone would be in love
                F                    G7
If it was easy  I'd be the first to do it
          C     F                   G7
If it was easy  I'd gladly go back through it
          C   F                   G7    C
If it was e-a-sy everyone would be in love

                                       F
I wish love was a part that you could play
                C                        G7
And then just walk away when the curtain falls
C                                  F
I wish that you could take it as it comes
                    C                      G7
And leave it when it goes without a second thought
      Am                                    F
But I guess that's not the way it's meant to be
  Am                                  F               G7
I try my best but love just seems to get the best of me

Repeat #2

              F   C             F
If it was e-a-sy  if it was e-a-sy
          C   F   C             F
If it was e-a-sy  if it was e-a-sy
```
