If She Could See Me Now-Ray Price
Author: Hank Cochran

```
G                                   C
I saw the one I loved and lost last night again
 D7                                  G
I smiled and said hello like we were still old friends
                                  C
Don't pity me it never matter anyhow
    D7                       G
But oh if she could see me now

   C                                 G
If she could see me now  when the night life's gone
                         A7                      D7
How sad I really looked  without my party face on
    G                                C
The way I just give up sit down and cry out loud
    D7                       G
But oh if she could see me now

                                  C
I'm first at every party and the last to leave
    D7                                G
And no one sees the hurt that's deep inside of me
                                       C
I drink too much and say who wants her anyhow
    D7                       G
But oh if she could see me now

                                     G
If she could see me now  when the night life's gone
                         A7                      D7
How sad I really looked  without my party face on
    G                                C
The way I just give up sit down and cry out loud
    D7                       G
But oh if she could see me now
