If The Shoe Fits-Waylon Jennings
Author:Harlan Howard and Freddie Hart

```
C                                        F
My friends all say that you're deceiving me
G7                                    C
And things are going on that I don't see
                                   F
I pay them no mind I love you so
              D7                                 G7
And if you're guilty then I just don't want to know

           F                                   C
But if the shoe fits then wear it if your mind hurts then bear it
      G7                                   C
It's your conscience to live with every day every night
        F                                  C
If you find it hard sleeping if you just lie there weeping
        G7                                   C
If the truth hurts then the shoe fits just right

                                          F
If you do wrong then it's your bill to pay
G7                                    C
It's you there in that mirror every day
                                   F
I love you and I plan to from now on
        D7                                 G7
I just can't believe you do your daddy wrong

Repeat #2

        G7                                   C
If the truth hurts then the shoe fits just right
```
