If The Whole World Stopped Loving-Eddy Arnold
Author: Ben Peters
[3/4 time]

```
G                          C
If the whole world stopped loving
    G       D7             G
The way you stopped loving me
                           C
Have you ever stopped to wonder
     G                        D7
What kind of place this would be
       G                   C
If the whole world stopped loving
    G                      D7
The way you stopped loving me

   G               C
If every heart was broken
    G                     D7
The way that you broke my own
       G                   C
And the whole world stopped loving
    G          D7        G
How long would living go on

                                    C
Hear the church bells ring in the steeple
   G                                 D7
As they ring their song through the air
       G                   C
If the whole world stopped loving
        G                   D7
There'd be no steeple bells there
    G                      C
The tears would fill the river
     G                     D7
Till the rivers flooded the sea

       G                   C
If the whole world stopped loving
    G       D7             G
The way you stopped loving me
                           C
If the whole world stopped loving
    G       D7             G
The way you stopped loving me
```
