If This House Could Talk-Stonewall Jackson
Author: Hugh X. Lewis

```
F                                C
If this house could talk oh what a story
  G7                              C
Although it's only made of wood and stone
F                                 C
How it would brag about its days of glory
     G7                     C
When it almost became a happy home

                     G7               C
I just came back in town to sign the papers
F                   G7                C
The house is sold now it's no longer mine
F
And since the place I built for you
C                     F
Once meant so much to me
C                       G7              C
Thought I'd drop by and see it one more time

                      G7                C
I parked the car got out and looked it over
F                     G7                C
The unkept lawn now seems so strange to me
F
That rambling rose that I'd set out
C                     F
With tender care had died
C                        G7              C
And weeds grow now where flowers used to be

                    G7                          C
I walked up close looked through the picture window
F                    G7                C
The past was oh so clear as I looked through
F
I listened close and almost heard
C                     F
Those tender words of love
C                 G7           C
As I sat by the fireside with you
