**If We Make It Through December-Merle Haggard**

```
G                     C                                          G
If We Make It Through December every thing's gonna be alright I know
                         Am                            D7              G
It's the coldest time of winter and I shiver when I see the falling snow
      G7              C
If We Make It Through December
                                  G
Got plans to be a warmer town come summer time
               Am
Maybe even California
D7    Am               D7               G
If We Make It Through December we'll be fine

                            Am
Got laid off down at the factory
D7        Am               D7              G
And their timing's not the greatest in the world
                     Am           D7     Am              D7                 G
Heaven knows I been working hard wanted Christmas to be right for daddy's girl
  G7                 C
I don't mean to hate December
                                  G
It's meant to be the happy time of year
                           Am                           D7                   G
And my little girl don't understand why daddy can't afford no Christmas here

                     C                                          G
If We Make It Through December every thing's gonna be alright I know
                         Am                            D7              G
It's the coldest time of winter and I shiver when I see the falling snow
      G7              C
If We Make It Through December
                                  G
Got plans to be a warmer town come summer time
               Am
Maybe even California
D7    Am               D7               G
If We Make It Through December we'll be fine
```
