Infamous Angel-Iris Dement

```
G                                    C
Last night before I went to sleep my knees dropped to the floor
                 G                                          D7
I turned my eyes up to the sky and I prayed please help me Lord
G                                    C
You know I've sowed my wild oats and now the fun's all gone
                 G                            D7         G
And then I heard these tender words and I put them in my song

                        C                     G
Infamous Angel come on home   to someone who loves you
                         D7
And knows you needed to roam
G                                  C
Grab your things a ticket's waiting at the bus depot
             G     D7          G
For Infamous Angel destination home

                                        C
I heard Heaven's choir rejoicing as the tears broke from my eyes
                 G                              D7
And all at once it lifted the weight from my past life
G                               C
I found a pen and I left a note on the dresser drawer
         G         D7                G
Infamous Angel she don't live here anymore

Repeat #2

                                  C
Then I hurried out the back door as quickly as I could
                 G                                          D7
I went flying down two flights of stairs till on the street I stood
G                                  C
And there I took that final look at my old neighborhood
                           G           D7                G
Then I ran down the street proclaiming angel's gone for good

                       C                     G
Infamous Angel going home   to someone who loves her
                         D7
And knows she needed to roam
G                                          C
She grabbed her things and claimed the ticket at the bus depot
             G     D7          G
For Infamous Angel destination home
C        G     D7          C  G
