C            Em
Every sleepy dawn wakes to find you
Am            C
Gone and it's lonely
             Em              Am
All my sunny days laugh and run away
     D7
It's lonely

    C
The sun don't really shine it's lonely
             F
Always to remind me that it's only another day
   G7                  C       F
To feel this way it's lonely  lonely

A7                  D7

G7                   C
Without you I find it's lonely

Each new starry sky smiles

And says goodbye it's lonely
                  Em                        Am
Dreams we used to share tell me you don't care
D7
