It's My Fault-Hank Thompson

```
C              F             C
It's my fault  now that I've lost you
         F      G7        C
You were right  to let me go
            F          C
People say  it's gonna cost you
       F     G7           C
I just said  she'll never know

          F                   C
I slipped around  and kept on lying
              D7                      G7
I should have known  that you'd catch on
C                     F         C
Your faithful heart  I kept denying
        F      G7           C
It's my fault  that you are gone

              F              C
Now you can't live a life forever
       D7                 G7
It overtakes you by and by
C                 F             C
The bonds of love it's sure to suffer
        F      G7            C
It's my fault  that you said goodbye
```
