It's Not Too Hard-Marty Robbins

```
C                                    F
Sometimes when she thinks that I'm not looking
C                                G7
I can see the teardrops in her eyes
          C
She's been walked on she's been hurt
         F
Someone's treated her like dirt
        C               G7              C
Oh it's not too hard to see through her disguise

F                                 C
She goes on pretending that she needs me
                                 G7
And I'm the only reason she survives
           C
But there's still the biggest part
     F
Of a footprint on her heart
        C                G7              C
Oh it's not too hard to see through her disguise

                                     F
Sometimes late at night I feel a tremble
C                                              G7
And it's hurts to know she hurts so much she cries
          C
And she's trying hard to be
    F
The woman she won't ever be
        C               G7              C
Oh it's not too hard to see through her disguise

F                                   C
She keeps telling me she'll never leave me
                                      G7
But I can see the truth it's in her eyes
        C
Cause I know she'll leave me when
   F
He wants her back again
        C               G7              C        F
Oh it's not too hard to see through her disguise

        C               G7              F     C
Oh it's not too hard to see through her disguise
```
