It's Only Love-Ray Price
Author:Hank Cochran

```
G                C    F        D7
If I don't act myself when I'm around you
                                    G   D7
And I bring up the things you used to say
G                    C          F               D7
Well I just haven't learned to forget like you do
                           G
But it's only love it'll go away

                   C     F                   D7
And if I call at night while you're still sleeping
                                  G   D7
Just to talk to you about yesterday
G                  C   F          D7
Then before I hang up  I start to weeping
                              G
Well it's only love it'll go away

F                       G
It's only love it'll go away
   A7                    D7
At least that's what you say
G                   C         F           D7
Well yours did and mine will I hope some day
                             G
Cause it's only love it'll go away
D7                      G
It's only love it'll go away
```
