It's Over Over Nothing-Hank Snow
Author: Betty Jean Robinson and Tony Seen

```
C                                   G7
The sweetest thing that ever came into my life was you
                                      C
The only girl in this whole world that turned my grey skies blue
                                    G7
Your tender love like a velvet glove enclosed around my heart
                                      C
Told me we'd still be lovers when this old world fell apart

C7          F          C           G7                                  C
But now it's over  over nothin'  my heart just felt the final curtain fall
C7          F          C             G7                        C
And now it's over  over nothin'  it's over  over nothin' at all

                                      G7
We climbed the highest mountain then  you always held my hand
                                   C
And in my darkest moments you were there to understand
                                    G7
Then a hasty word misunderstood and pride that took command
                                          C
Made all those castles that love built come tumbling down in sand

C7          F          C           G7                                  C
But now it's over  over nothin'  my heart just felt the final curtain fall
C7          F          C             G7                        C
And now it's over  over nothin'  it's over  over nothin' at all
```
