It's Teardrop Time-Dottie West
Author:Dallas Frazier and Buddy Mize

```
C                          G7
It's teardrop time I'm all alone again
                             C
It's teardrop time my baby's gone again
             C7          F
My happiness has left me here behind
             C          G7           C
Sad eyes get set to cry it's teardrop time

C7         F                        C
Again he's heard the call from his old flame
        D7                                      G7
And the fire that beckoned took him just like an evening train
             C                  F
Love lives no more inside this world of mine
            C             G7            C
Hang on and help me heart it's teardrop time

G7            C                F
Love lives no more inside this world of mine
            C             G7            C
Hang on and help me heart it's teardrop time
F       C             G7            C
Hang on help me heart it's teardrop time
```
