It's Your World-Marty Robbins

```
C                                          F
It's your world and your smile turns on my sunshine
         G7                                C
You have all the power it takes to keep me blue
                                             F
You control the way I feel both day and night time
          G7                           C
It's your world and I'm just passing thru

C7     F
Let me live let me live
       C
Let me live in live in your world
   G7                   C
If only for part of the time
      F
There must be there must be
   C
Oh sweet love in  your world
           G7                  C
Cause there just isn't any in mine

                                       F
It's your world and I don't belong in it
          G7                       C
Foolishly I keep pretending that I do
                                                      F
From the first you've made it plain that you don't need me
          G7                           C
It's your world and I'm just passing thru
```

Repeat #2
