It Must Be You-Dolly Parton
Author:Blaise Tosti

```
C                                G7
Just like the tide goes with the sea
                            C
We belong together you and me
                                 G7
Just like the dawn followed by day
                                                      C
We'll always be together and that's just how it will stay

           G7                                  C
It must be you that's always walking in my dreams
           G7                                    C
It must be you who'll always be right next to me
            F               G7                    C               F
So when you find yourself alone just think of me and I'll be there
         G7                                  C
Must be you by my side the whole way through

                                   G7
Just like the fresh white winter snow
                                      C
Our love is pure and it will always grow
                                 G7
And when we're in those autumn years
                                                    C
Together we'll look back but we won't shed a single tear

          F              G7                    C               F
When you find yourself alone just think of me and I'll be there
         G7                                  C
Must be you by my side the whole way through
```
