It Sure Was Love-Kris Kristofferson with Rita Coolidge
Author:Kris Kristofferson

```
C                    G7             C
They said what do you think you would do
                    G7           C
If she told you that she'd been untrue
       F                   C
I said I won't say I won't be sorry
G7                        C
It sure was love while it lasted

                        G7          C
They said how will you feel deep inside
                   G7              C
When the love you believed in has died
F                C
I said it won't hurt me
G7                        C
It sure was love while it lasted

F                         C
I'll be livin' off of the good times
G7                   C    C7
That you've given me today
F                          C
I have had my share of the sunshine
D7                   G7
I can stand a little rain

C                  G7             C
So we don't give a damn what they say
                  G7              C
We got something they can't take away
F                    C
Cause whatever comes tomorrow
G7                        C
It sure was love while it lasted

G7                        C
It sure was good while it lasted
G7                        C
It sure was love while it lasted
```
