It Takes Me All Night Long-Cal Smith
Author: Bozo Darnell and Dave Pittman

```
C                              F
I used to get more women than I could put my hands on
G7                                  C
Now I put my hands on more than I can get
                               F
If I knew I had to do what I used to love to do
  G7                           C
I doubt if I could do it on I bet

Cause it takes me all night to do
       F
What I used to do all night long
    G7                                  C
The wild and wooly days have come and gone
                                     F
It takes me all night to do what I used to do all night long

C                               F
I'm not the young rooster that I was in my day
G7                              C
But I still like to crow some anyway
                                      F
I'm not the king of a chicken yard but I could keep one old hen tired
G7                                  C
If I keep it up and it ain't a rainy day

Repeat #2

    G7                                  C
The wild and wooly days have come and gone
```
