Jealousy-Kitty Wells
Author: Jim Anglin

```
G        C           D7
Jealousy is there no cure
                                      G
Your distrust hurts me darling that's for sure
                                   C
Have faith in my love or set me free
        D7                          G
You are driving me crazy with jealousy

         C        D7
Jealousy you must control
                                             G
Your suspicious heart controls your life and soul
                                          C
Don't you realize the shame it's causing me
          D7                          G
Making me feel like a fool by jealousy

           C         D7
Jealous of the air I breathe
                                     G
Don't be a fool your love I've never deceived
                                   C
If you are in love oh can't you see
           D7                          G
That you're wrecking my life with jealousy
