Just A Foolish Notion-Curtis Potter
Author:Dallas Frazier and Buddy Mize

```
C                                  G7
Ever since you left me I've been waiting for your call
                                      C
And hoping you'd come back where you belong
                                   F
I told myself a thousand times our love would never die
      C               G7                C
But a foolish notion proved that I was wrong

F                           C
Just a foolish notion that kept you in my heart
F                           C                G7
Just a foolish notion that tore our world apart
  C                                 F
I wouldn't let myself believe your love had let me go
       C               G7           C
It was just a foolish notion now I know

                                   G7
At night when other people dream I lie awake and cry
                                     C
And wonder how I could have been so blind
                                  F
Foolishly I kept pretending that our love was true
       C               G7              C
It was just a foolish notion you were mine
