Kinda Halfway Feel-Marty Robbins

Intro:

```
F                       G7            C
Kinda halfway feel that you and I are through

                                     G7
Here I am and I'm alone and feeling lonely
F                          G7                C
Bothered by the thought that someone's holding you
                                          G7
Disappointed and I'm wanting your kiss only
F                       G7            C
Kinda halfway feel that you and I are through

           F                                C
I play the jukebox and I set you halfway hoping you'll walk in
            G7                                 C
And halfway knowing that you won't be by yourself
              F                      C
There's such a feeling in my heart I halfway face the truth
F                       G7                C
Kinda halfway feel that you want someone else

                                    G7
At a table where you used to sit beside me
F                    G7               C
In a corner that we felt was all our own
                                              G7
So in love that my heart's breaking up inside me
F                           G7              C
It's a different world when you're left all alone
```

Repeat #2
