Let Me Help You Forget-Kitty Wells
Author: Jim Anglin

```
C                                    F
Let me help you forget one who forgot you
               G7                              C
Let me make you realize your dreams can't come true
                                               F
Don't cry over her she left you with the blues
               G7                               C
Let me help you forget with the love that is true

                                          F
I understand darling why you feel this way
              G7                          C
Afraid to take a chance first love went astray
                                           F
Let my arms erase memories that hurt you yet
         G7                       C
Trust me darling let me help you forget

                                      F
I'll make you happy just forget the past
             G7                            C
Stop brooding for false love it never does last
                                            F
Just listen to your heart and I'll do the rest
           G7                         C
Life can be beautiful let me help you forget
```
