Lift Ring Pull Open-Jim Ed Brown
Author:Joe Cooper and John Gallie

```
C                                                D7
There are four words that are printed on most every can of beer
G7                                                    C
Four words that I live by since my baby's gone away from here
                                          D7
I've sampled all the different brands from every brewery
    G7                                                          C
And found one that goes down just right and soothes my sorrow to a tee

                                 D7
Lift ring  pull open it's all spelled out for you
G7                                                  C
Nothing could be more easy it's something any fool can do
                           D7
Lift ring  pull open and have a drink with me
     G7                                          C
As I try to forget I'm a loser and drown my misery

Yes sometimes life seems so useless
                D7
Still there are things to look forward to
         G7                                          C
A little music from a jukebox and a cool refreshing brew
                                 D7
A friendly game of poker with stakes that are too high
     G7                                              C
Such things will help me pass the time until the day I die

                              D7
Lift ring  pull open that's all you have to do
G7                                                  C
Nothing could be more easy it's something any fool can do
                           D7
Lift ring  pull open and tip a can with me
     G7                                        C
As I try to forget I'm a loser and escape this misery

                              D7
Lift ring  pull open don't even need a key
     G7                                                  C
I'll just pop a top and drink to the last drop and drown my misery
```
