Lilly Of The Valley-Marty Robbins

```
C                        F                  C
I grew up in Alabama in a valley I called home
                                             G7
And I learned to love sweet Lilly from the start
C                          F                 C
But I had to do my duty yes I had to do my part
                           G7                C
But the thought of leaving Lilly breaks my heart

                                  F                    C
If this war could just be over and I could go back home
                                    G7
If I could hold and kiss her once again
C                                 F                 C
Then if I should die tomorrow after loving her tonight
                            G7                  C
Then I would not feel my life had been in vain

Cause she's my Lilly of the valley
                          G7
And I want her for my wife
C                 C7      F
She's my Lilly of the valley
         C                  G7              C
I guess I've loved Lilly almost all my life

F       C
All my life
```
