Mad Mad World-Ricky Nelson
Author:Dorsey Burnette and Joe Osborn

```
C                        F       C
Everybody's runnin' in a mad mad world
             G7      C
But nobody's goin' nowhere
                        F             C
Everybody's gotta have more than the others
           G7             C
Gotta have more than their share

G7                            C
Ever since the devil tempted woman with an apple
      F                       C
We've all had a burden to bear
                                F                    C
Now the world keeps turnin' and things are gettin' faster
          G7      C
Nobody's goin' nowhere

                              F            C
They say the grass is greener on the other side
                G7          C
When they cross over they find
                             F       C
Everybody's searchin' like you and me
               G7       C
Tryin' to find peace of mind

G7                   C
See that little boy fishin' on the river
F                        C
If I could just be like him
                              F            C
I'd close my eyes and let the mad world go by
                G7       C
If only I could be like him

Repeat #4

                              F            C
I'd close my eyes and let the mad world go by
                G7       C
If only I could be like him
                G7       C
If only I could be like him
```
