Most of the Time-Jim Reeves

```
G C              D7              G
I  just burned the picture that you gave me
 D7                            G
I burned all your love letters too
 C              D7              G
I know that won't tear you from my mem'ry
   D7                        G
But tell me what else I can do

 C            D7                G
I gave away the things that remind me
 D7                        G
I hardly ever mention your name
   C            D7         G
Our friends never see you beside me
   D7                              G
But I know you're there just the same

D7                                 G
Most of the time you'd think I'm happy
D7                                 G
Most of the time there's someone new
   C          D7               G
But most of the time I feel like cryin'
D7                                  G
And most of the time that's what I do
```
