Old Violin-Johnny Paycheck

```
C                    F              C
Well I can't recall  one time in my life
                    G7        C
I've felt as lonely as I do tonight
                              F             C
I feel like I could lay down  and get up no more
                         G7             C
Its the damnedest feeling  I never felt before

                 F           C
Tonight I feel  like an old violin
                 G7                C
Soon to be put away  and never played again
                                  F             C
Don't ask me why I feel like this  hell I can't say
  F              C        G7            C
I only wish this feeling  would just go away
                       F                                    C
I guess its 'cause the truth is the hardest thing I ever faced
                 F           C             G7                 C
Cause you can't change the truth in the slightest way  I tried

                               F                     C
So I asked myself I said John where do you go from here
                                G7                        C
Then like a damn fool I turned around and looked in the mirror
             F          C
And there I saw an old violin
F           C          G7                C
Soon to be put away  and never played again

So one more time just to be sure
F              C                              F
I said John  where in the hell do you go from here
C                                             G7
And you know there wasn't a nickel's worth of difference
               C             F             C
When I looked in the mirror that's when I knew

                          F          C
That there I was seeing an old violin
F           C        G7                C
Soon to be put away and never played again

And just like that it hit me

That old violin and I were just alike

We'd give our all to music
    G7                   C
And soon we'll give our lives
```
