Once More With Feeling-Willie Nelson
Author:Shirley Nelson

```
C               F       G7              F    C
Once more with feeling once more with feel-ing
                            A7               D7
Won't you hold me till the night fades into day
C               F       G7              F    C
Once more with feeling once more with feel-ing
                              G7         F
Hold me close don't let this feeling go away

C                               F
Sometimes myself runs back to you
G7                             C
I just can't tell me what to do
                     F               D7
But I remember when all wrapped up tight within
    G7                                 C
The shelter of my arms you used to stay

                F       G7              F    C
Once more with feeling once more with feel-ing
                            A7               D7
Won't you hold me till the night fades into day
C               F       G7              F    C
Once more with feeling once more with feel-ing
                              G7         F   C
Hold me close don't let this feeling go a-way
```
