One Happy Christmas-Tammy Wynette
Author:Carmol Taylor

```
C                    F              G7                  C
I heard the doorbell ringing as the clock was striking three
                      F                  G7                C
I thought it could be Santa Claus since this is Christmas Eve
                  F                  C              F
I hurried to the door to find out what was going on
C                F                G7                  C
There you stood smiling telling me that you'd come home

                                    F
It's gonna be one happy Christmas one happy Christmas
C                                   D7                  G7
You and me and all the children gathered round the tree
              C                     F
It's gonna be one happy Christmas one happy Christmas
C                                   G7                  C
Old Santa did remember cause he brought you on to me

                    F                       G7              C
Let's not wake the children since they've finally gone to sleep
                      F                     G7                  C
They've been listenin' all night long for sounds of reindeer feet
                     F                   C                 F
They'll ask a hundred questions soon as they jump out of bed
C                    F              G7                  C
I know they'll ask you if ol' Santa brought you in his sled

Repeat #2
                                    G7                  C
Old Santa did remember cause he brought you on to me
```
