Over Something Good-George Jones
Author:Jodie Emerson

```
C                                        F
Your eyes could light the world tonight that's just how much they glow
G7                                                C
Your face could give your heart away everyone would know
                                      F
But you have fell in love with me I never thought you would
G7                                                C
But don't you let yourself feel bad over something good

                                    F
Let's be proud to show the world just what we've got into
G7                                                      C
Don't hang your head when you walk by honey let it show on you
                                     F
So hold me close and don't let go darling even if you should#
G7                                                C
And don't you let yourself feel bad over something good

F                      C
Over something good I know you're feeling bad
F                     C                     G7
But think about the lovely nights we've had
C                                  F
The things would be much better darling if you only could
G7                                             C
Keep yourself from feeling bad over something good

                                   F
Oh things would be much better darling if you only could
G7                                             C
Keep yourself from feeling bad over something good
```
